APP OBRA

Construction progress, visible in real time.

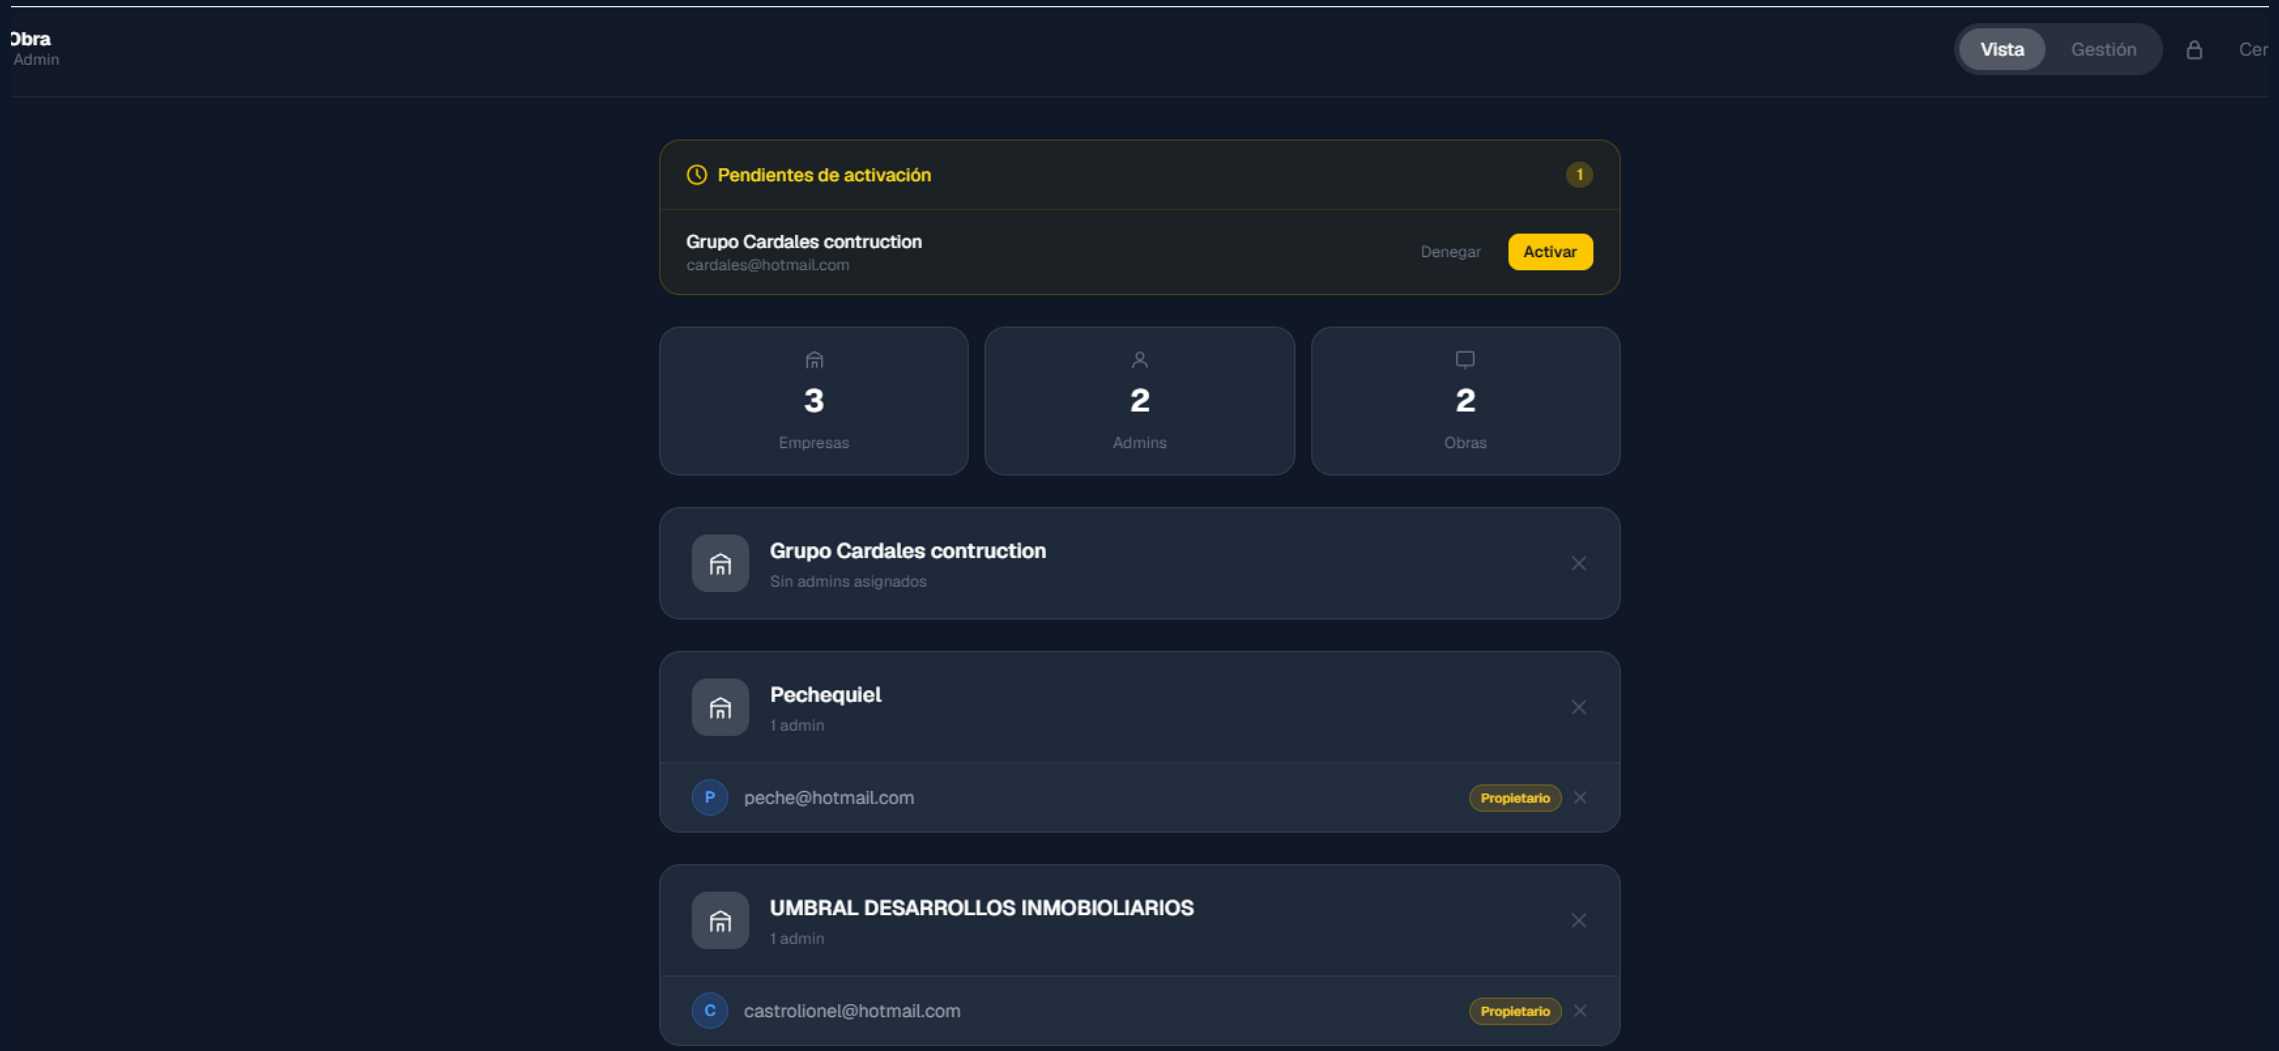

Super Admin | Company Admin | Collaborator | Client

Live application: appobra.com

SUPER ADMIN

Platform administration

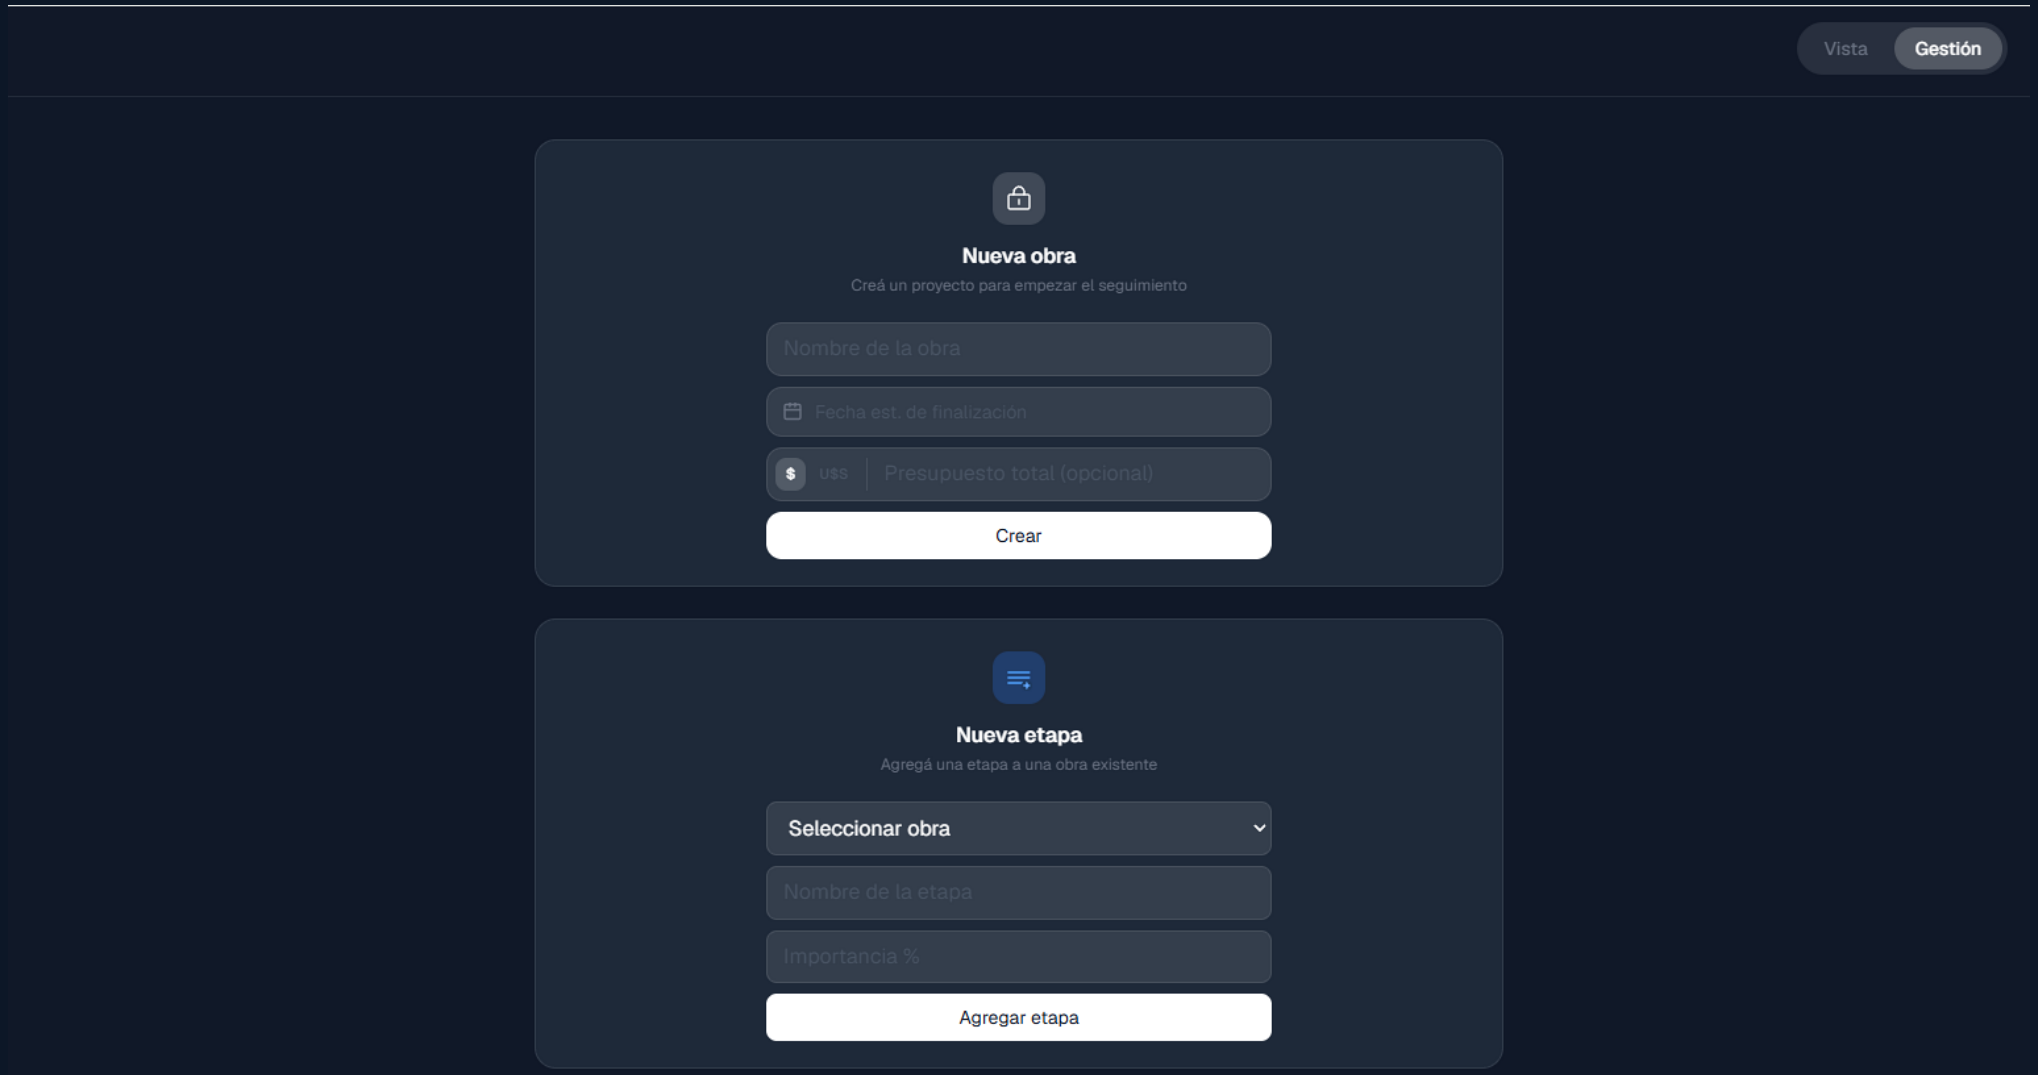

The Super Admin dashboard shows companies, administrators, works and pending activation requests.

ADMIN / COMPANY OWNER

Create works and stages

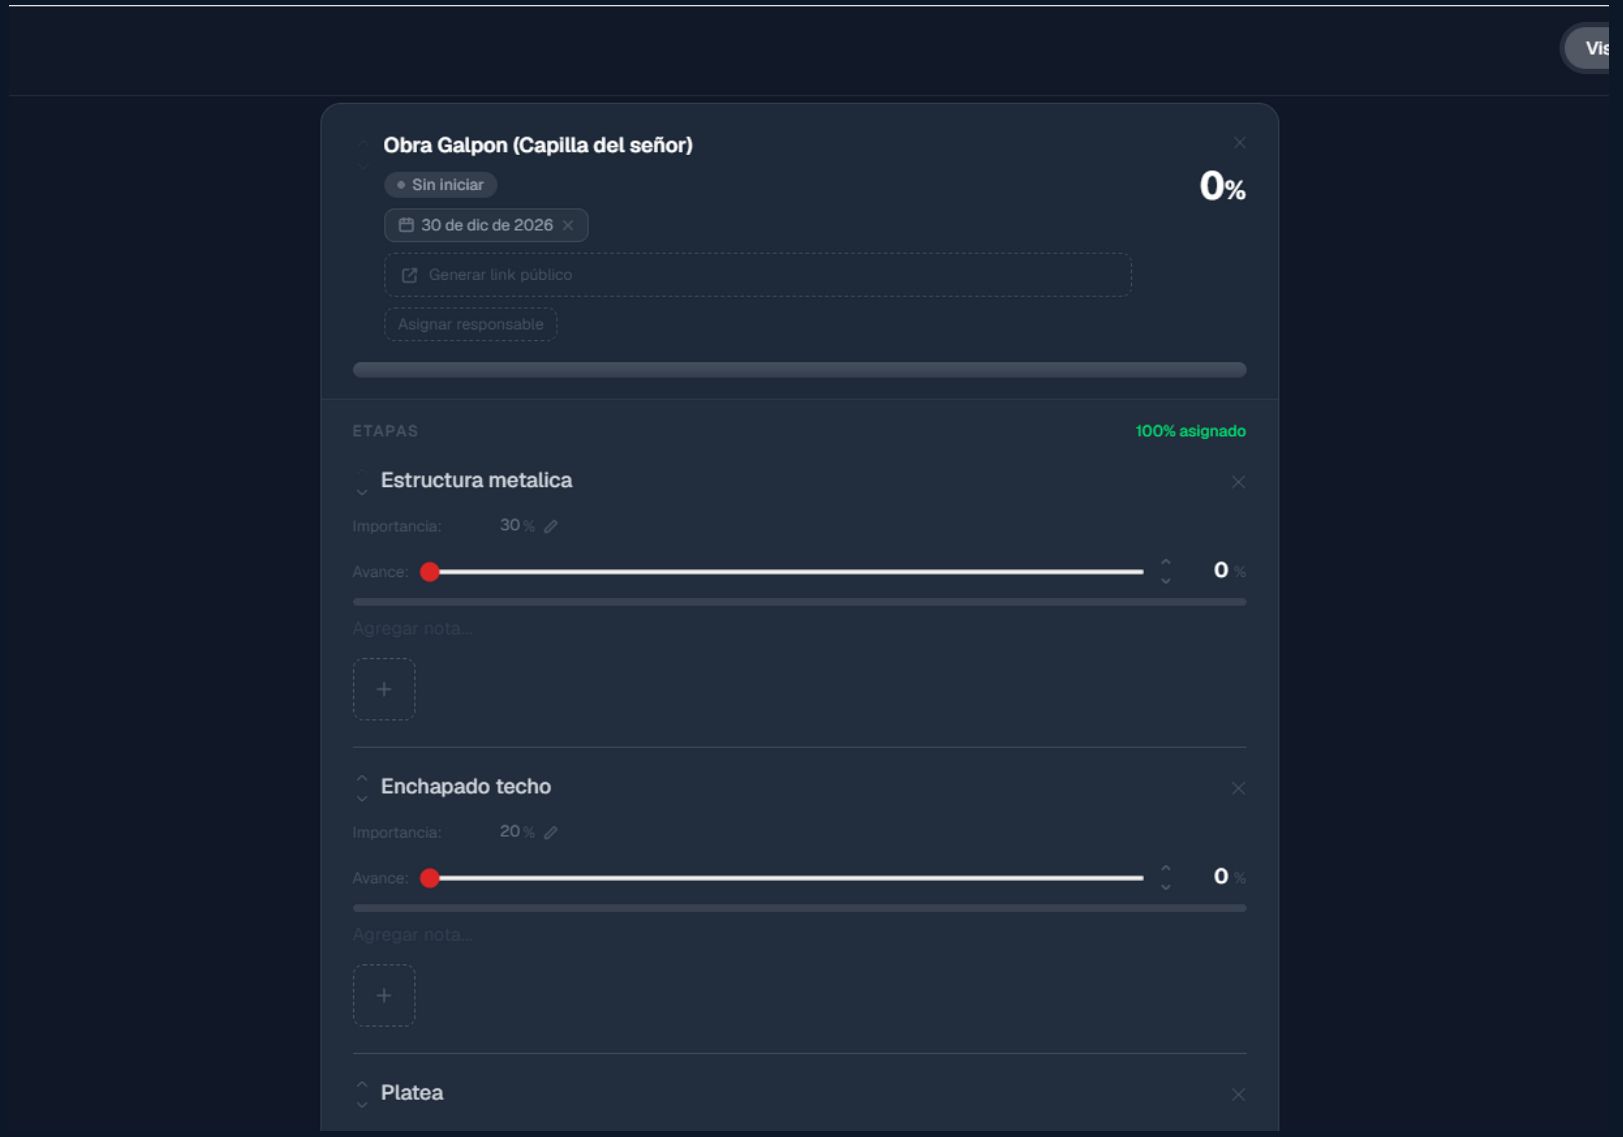

In Management, the company owner creates a work and then adds its stages with an importance percentage.

ADMIN / COMPANY OWNER

Project control

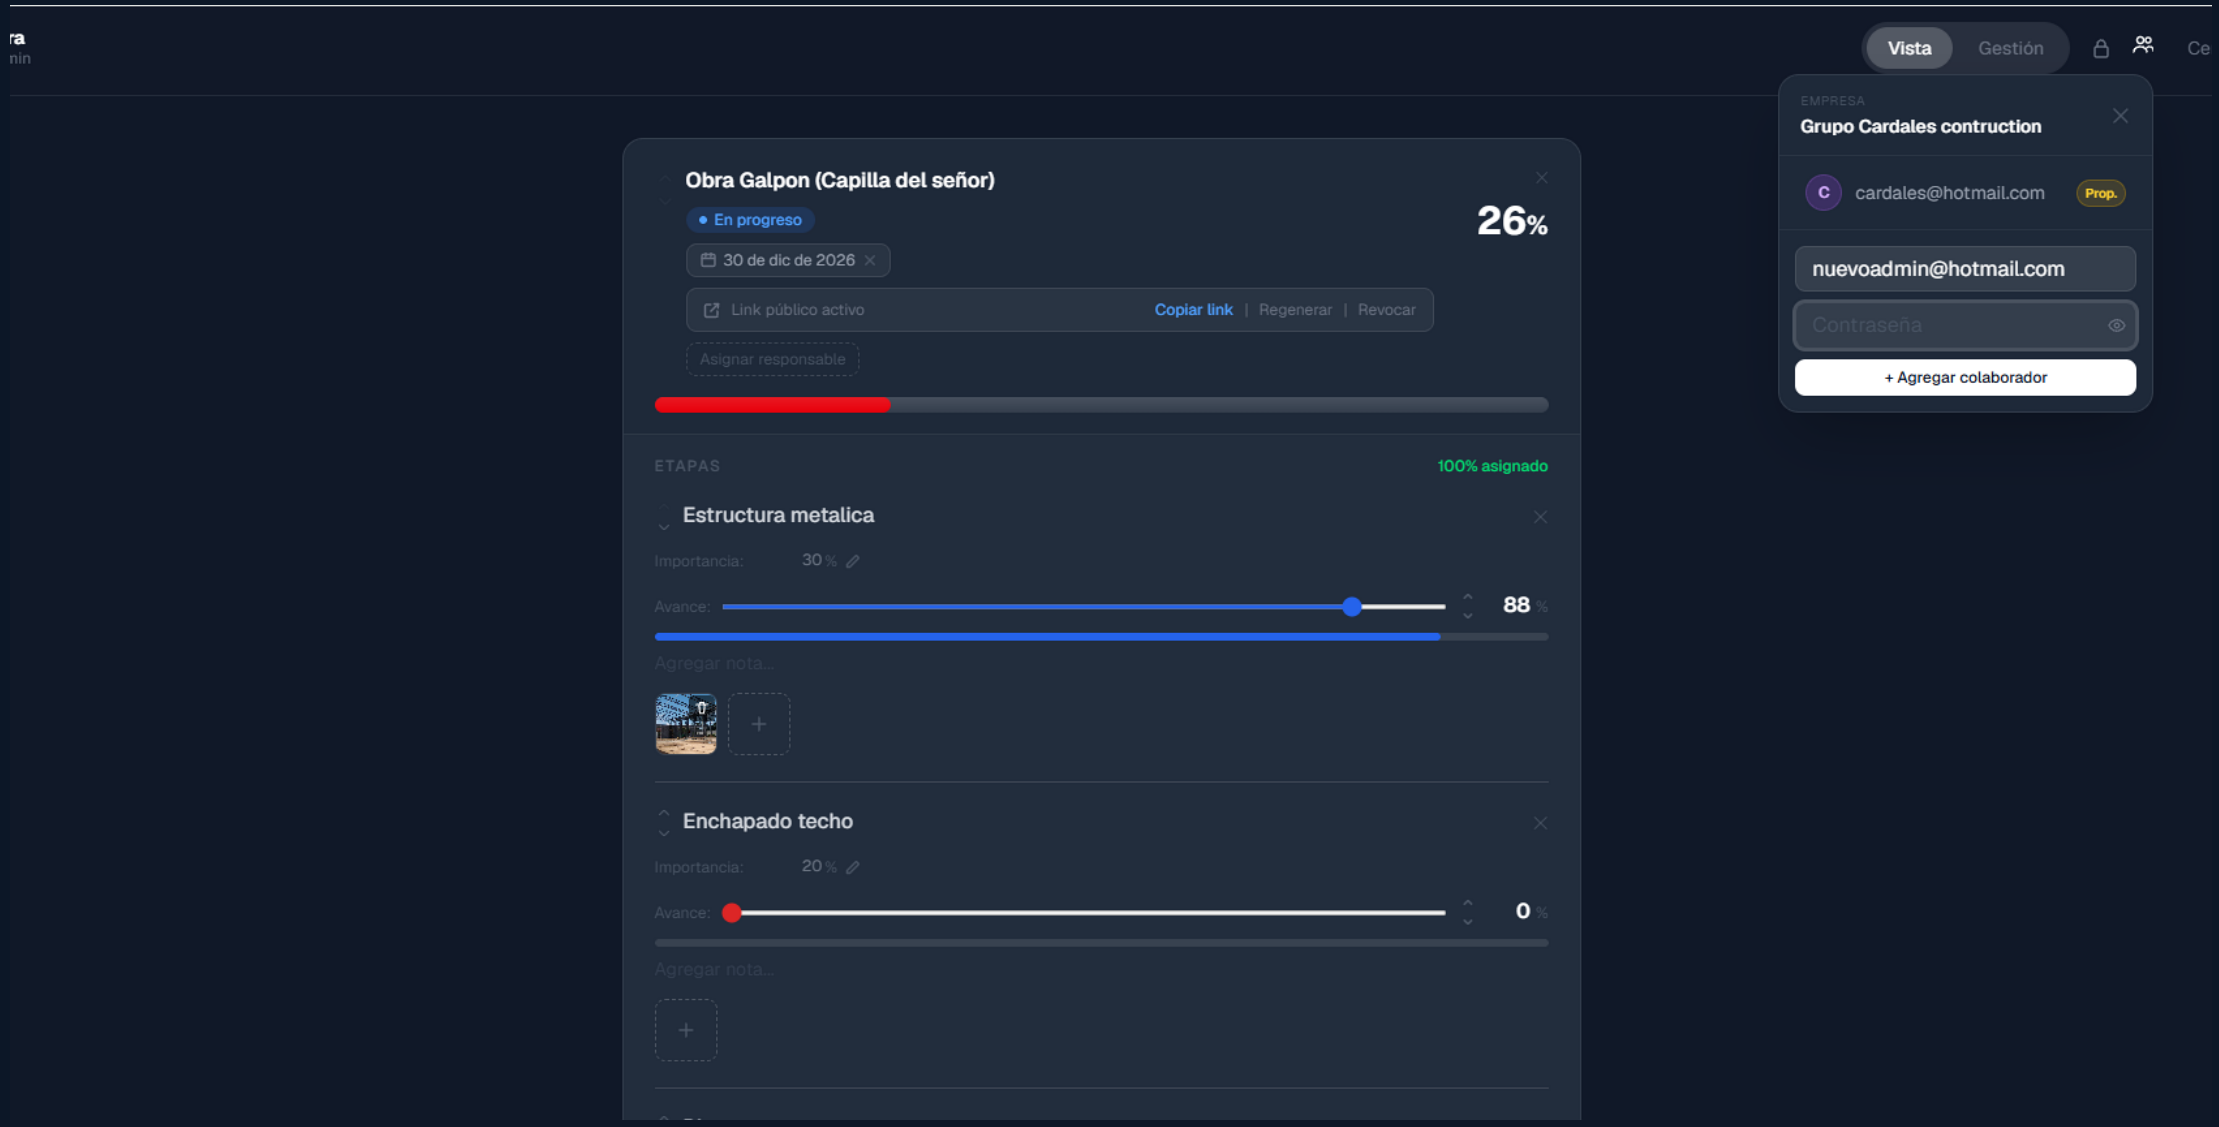

The project view brings together the finish date, public link, responsible person, weighted stages and budget.

ADMIN / COMPANY OWNER

Create and assign collaborators

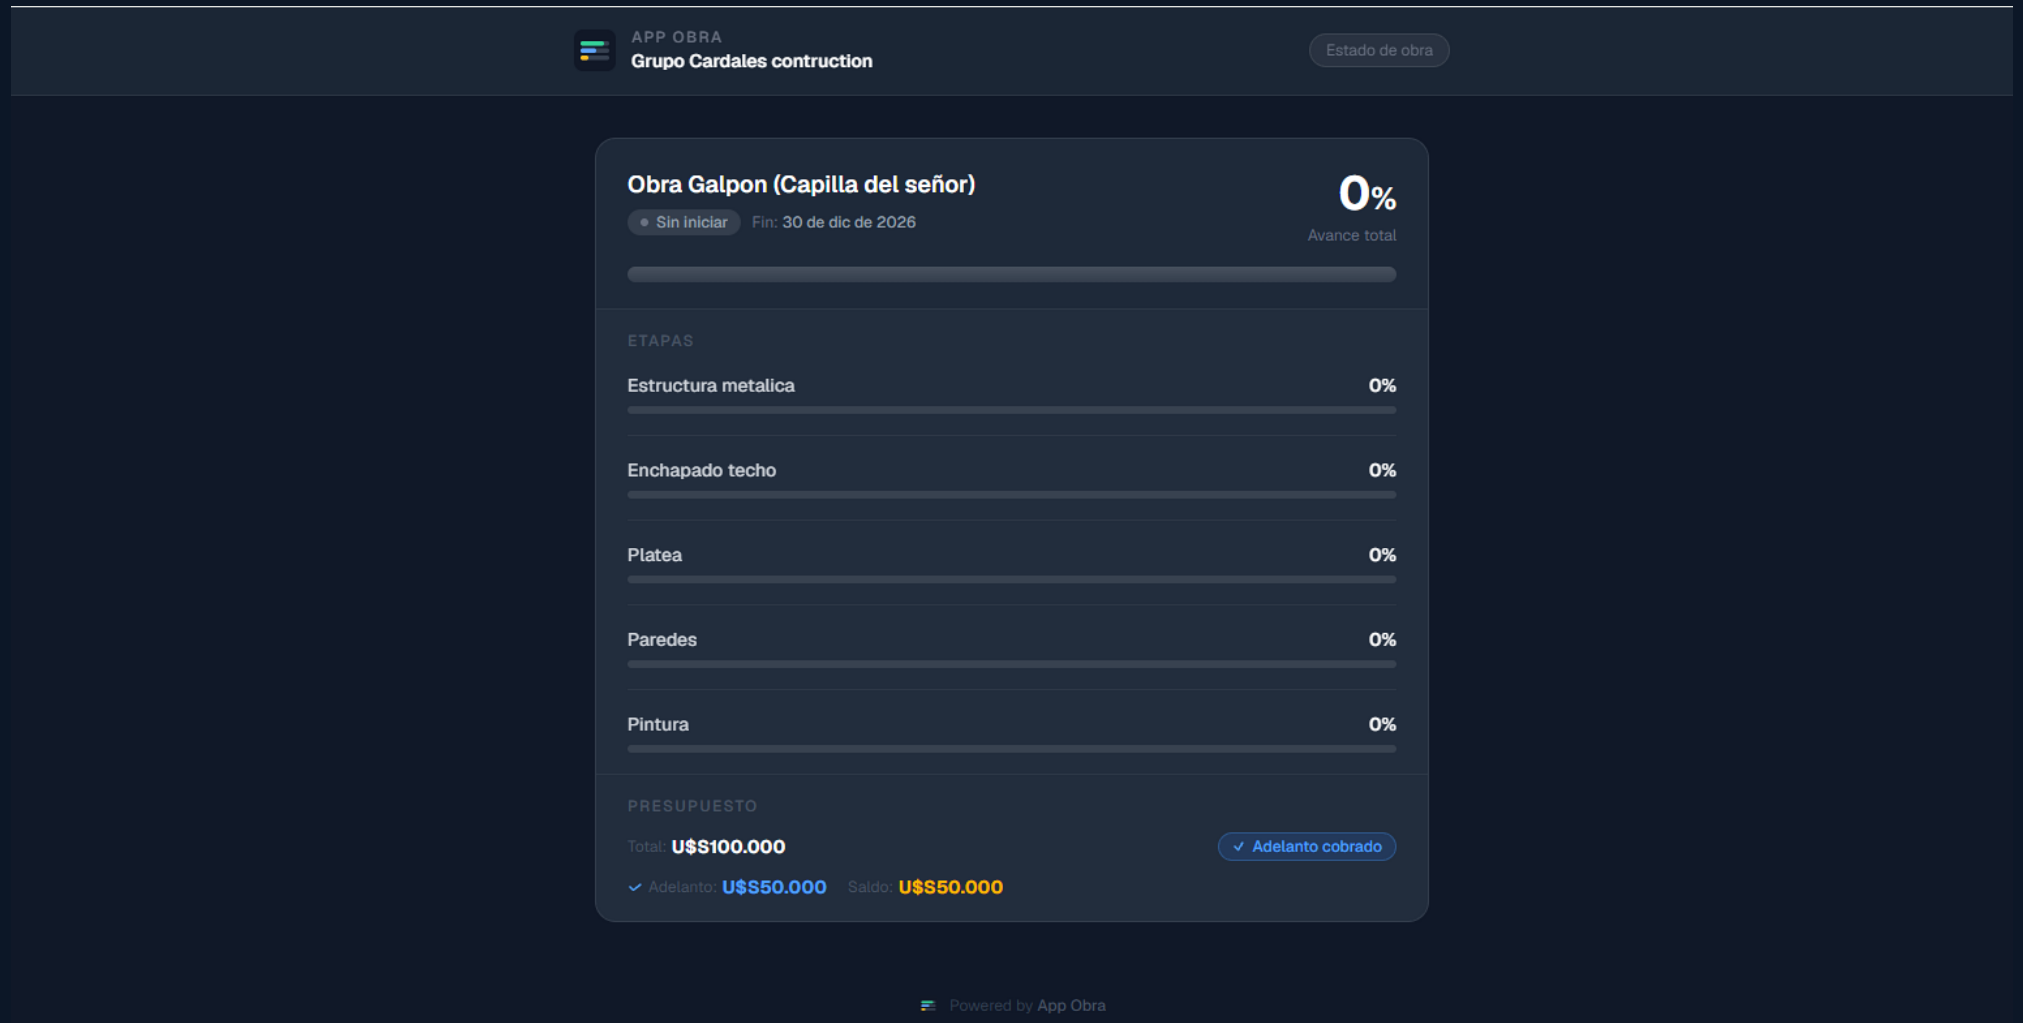

The company can add a collaborator and assign an existing responsible person to a specific work.

CLIENT

Public client view

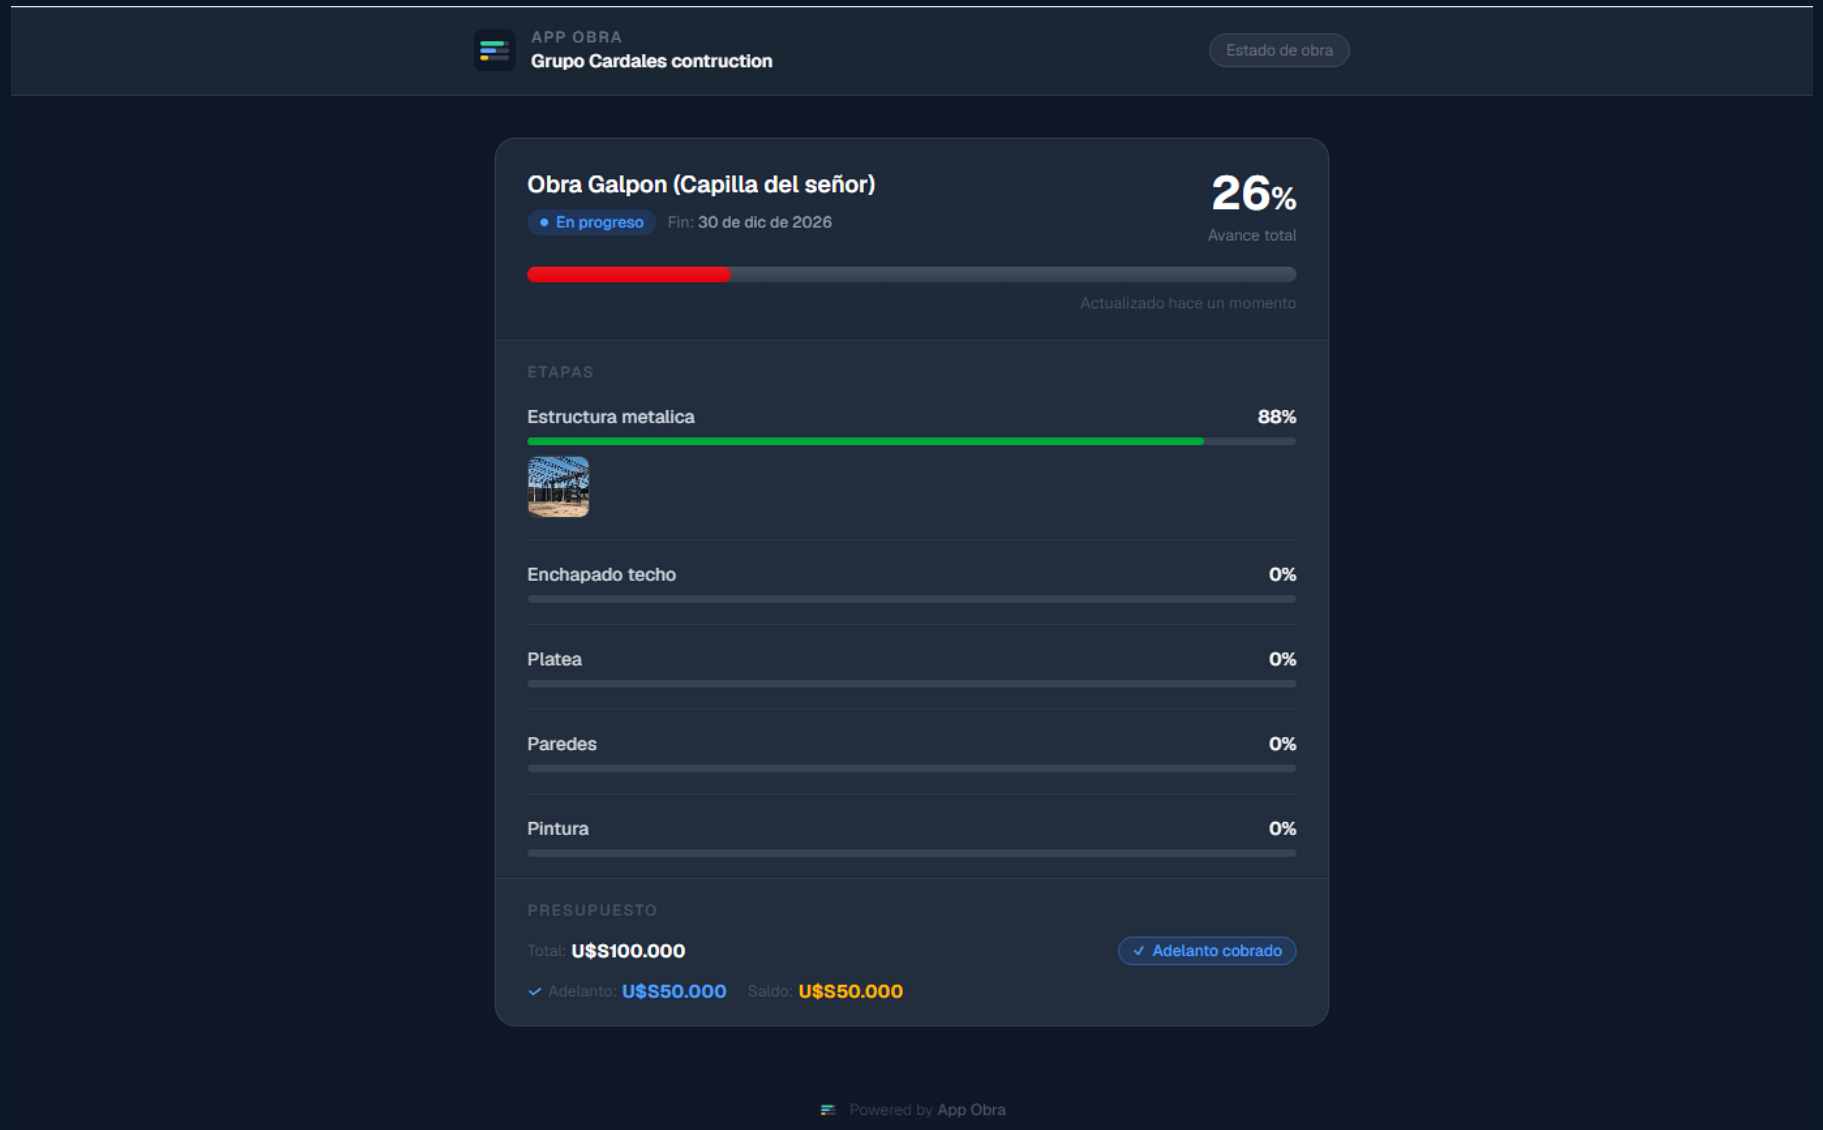

The client opens a read-only public link showing overall progress, stages and budget without administrative controls.

CLIENT

Progress reflected in real time

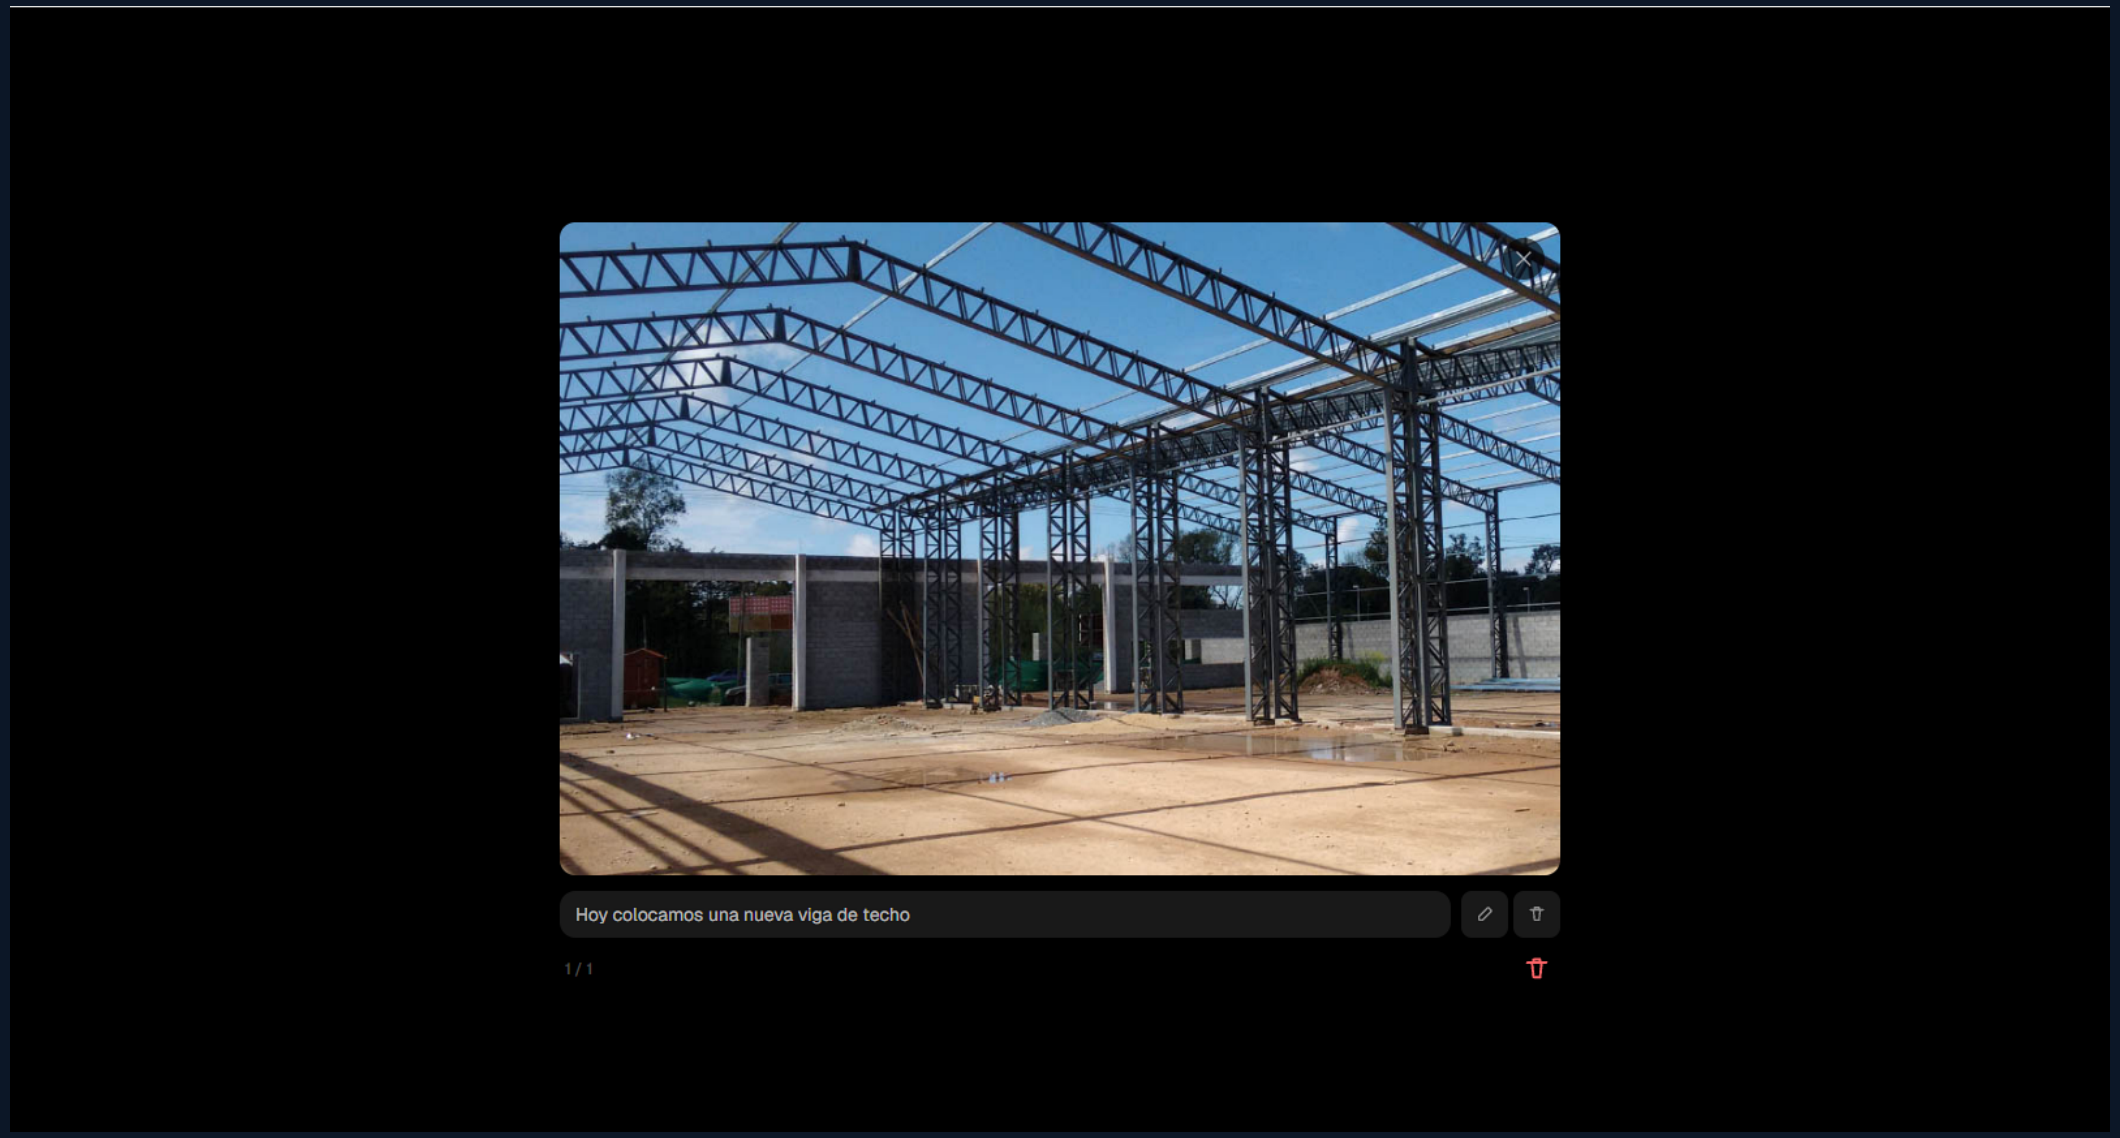

When the company changes a stage, the new percentage appears automatically for the client - no page refresh is required.

CLIENT

Photo evidence and comments

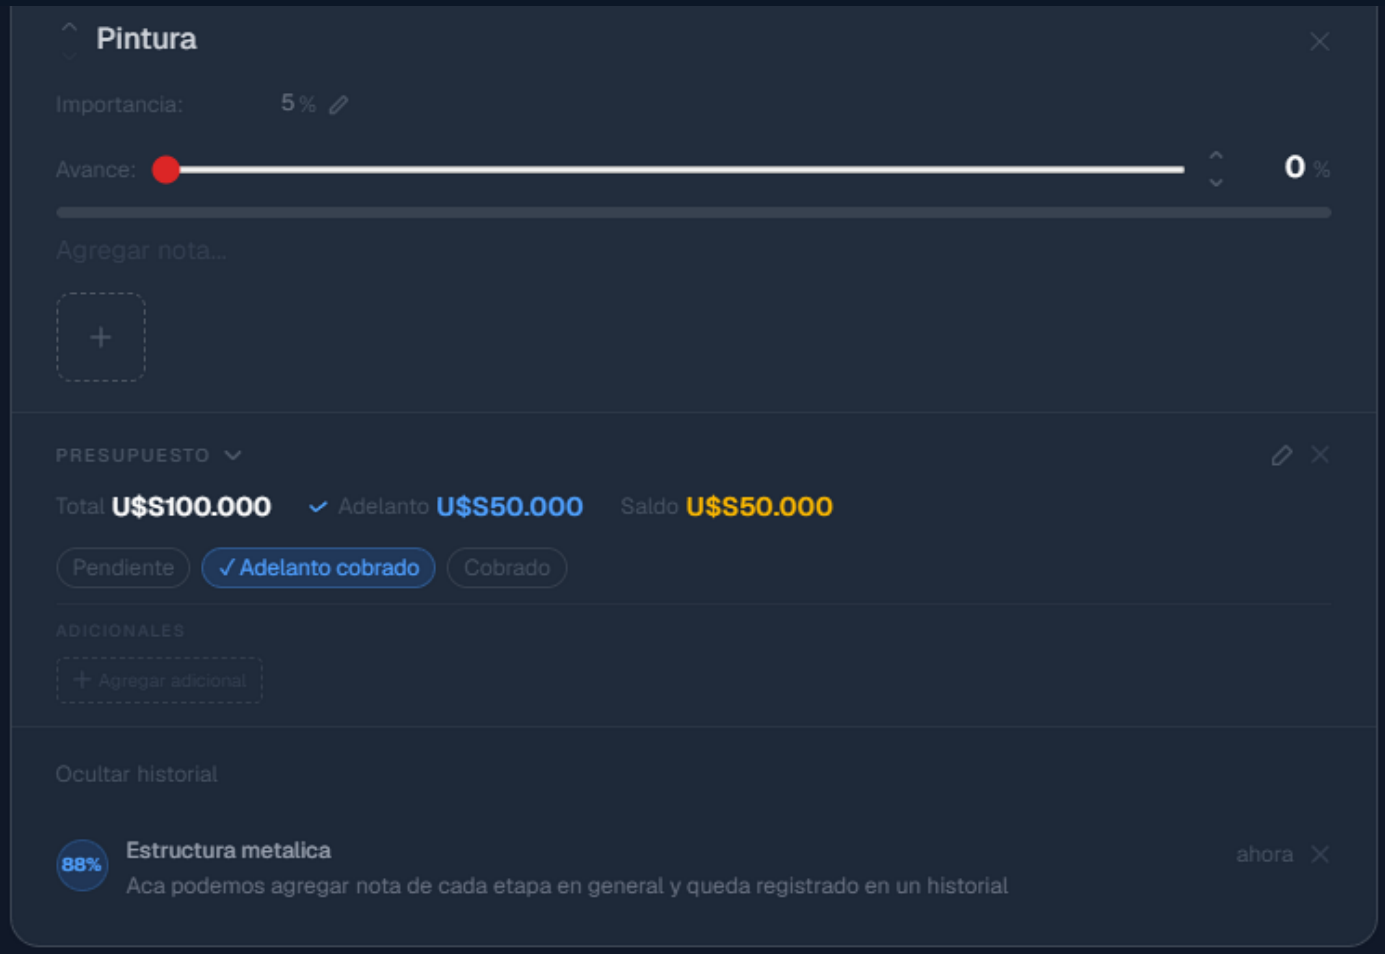

The client can open an uploaded construction photo and read the comment attached to that progress update.

ADMIN / COMPANY OWNER

Notes recorded in project history

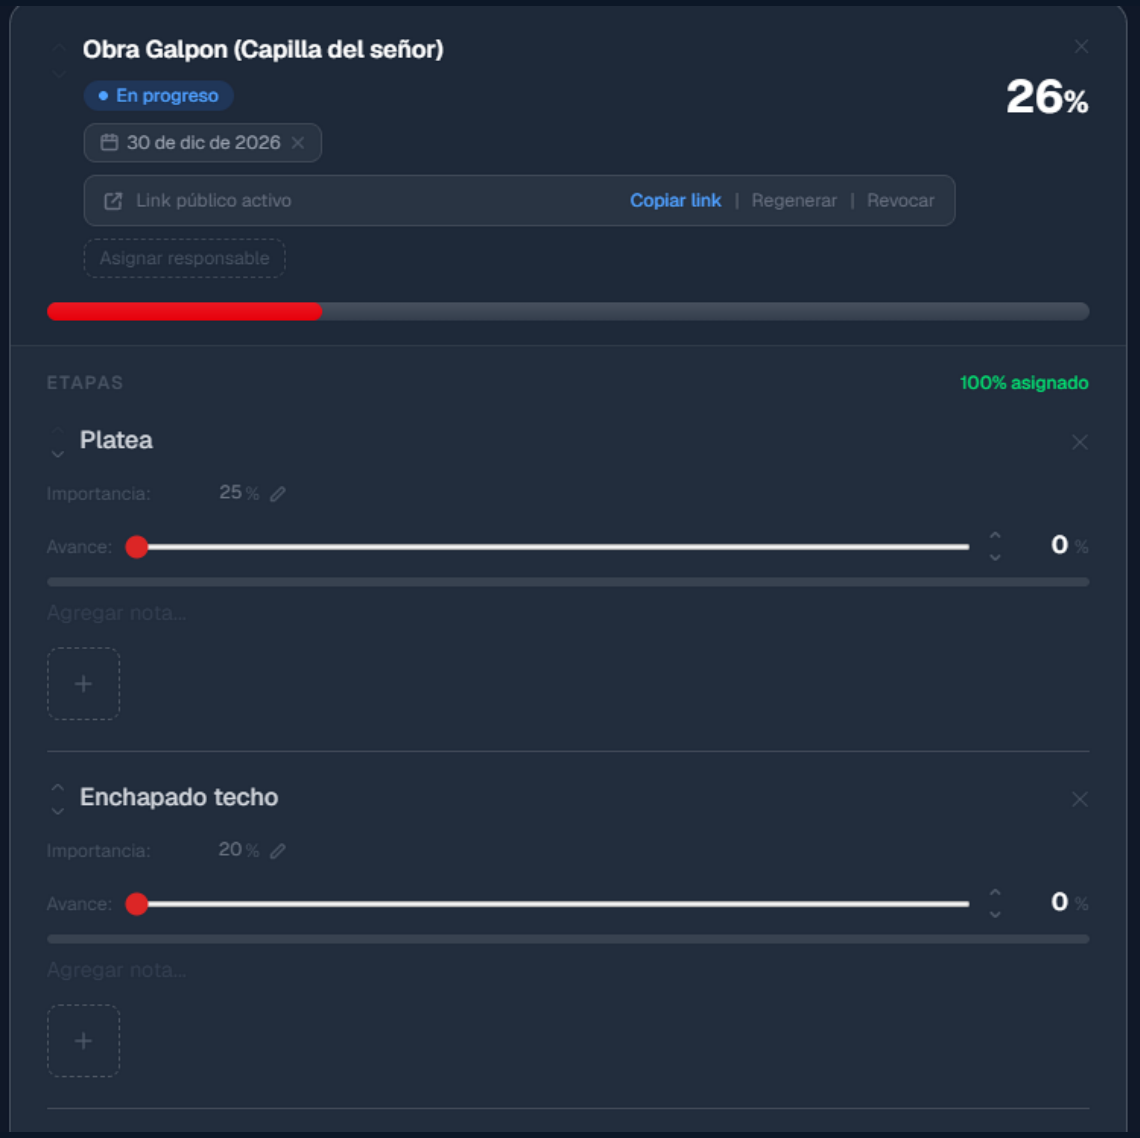

A saved stage note remains in the history together with the stage, progress percentage and time of the update.

ADMIN / COMPANY OWNER

Reorder project stages

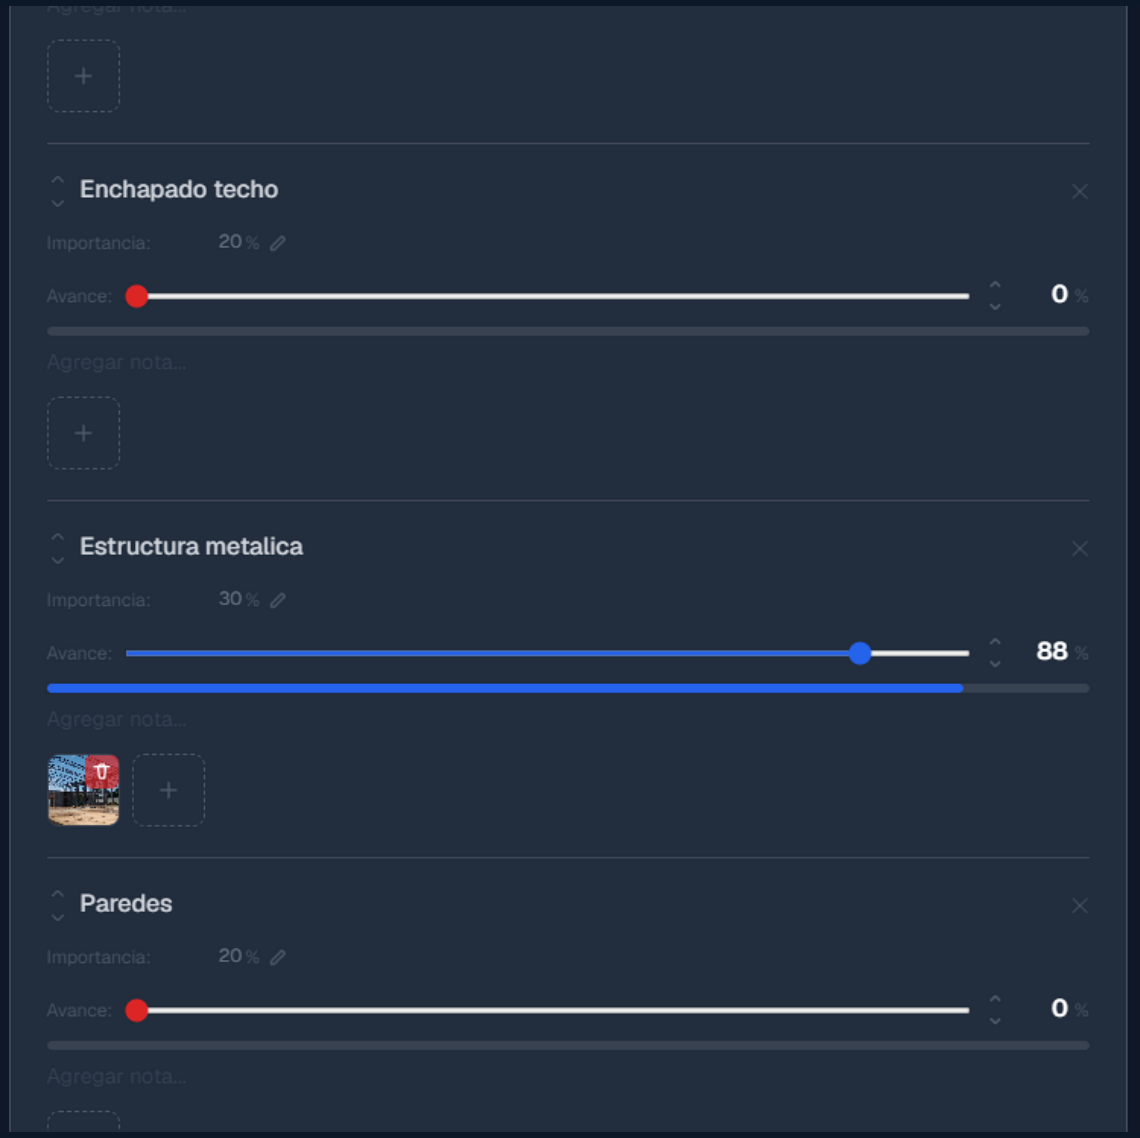

Stages can be moved to reflect the real construction sequence; here Platea is first and Estructura metalica is third.

ADMIN / COMPANY OWNER

Weighted progress by stage importance

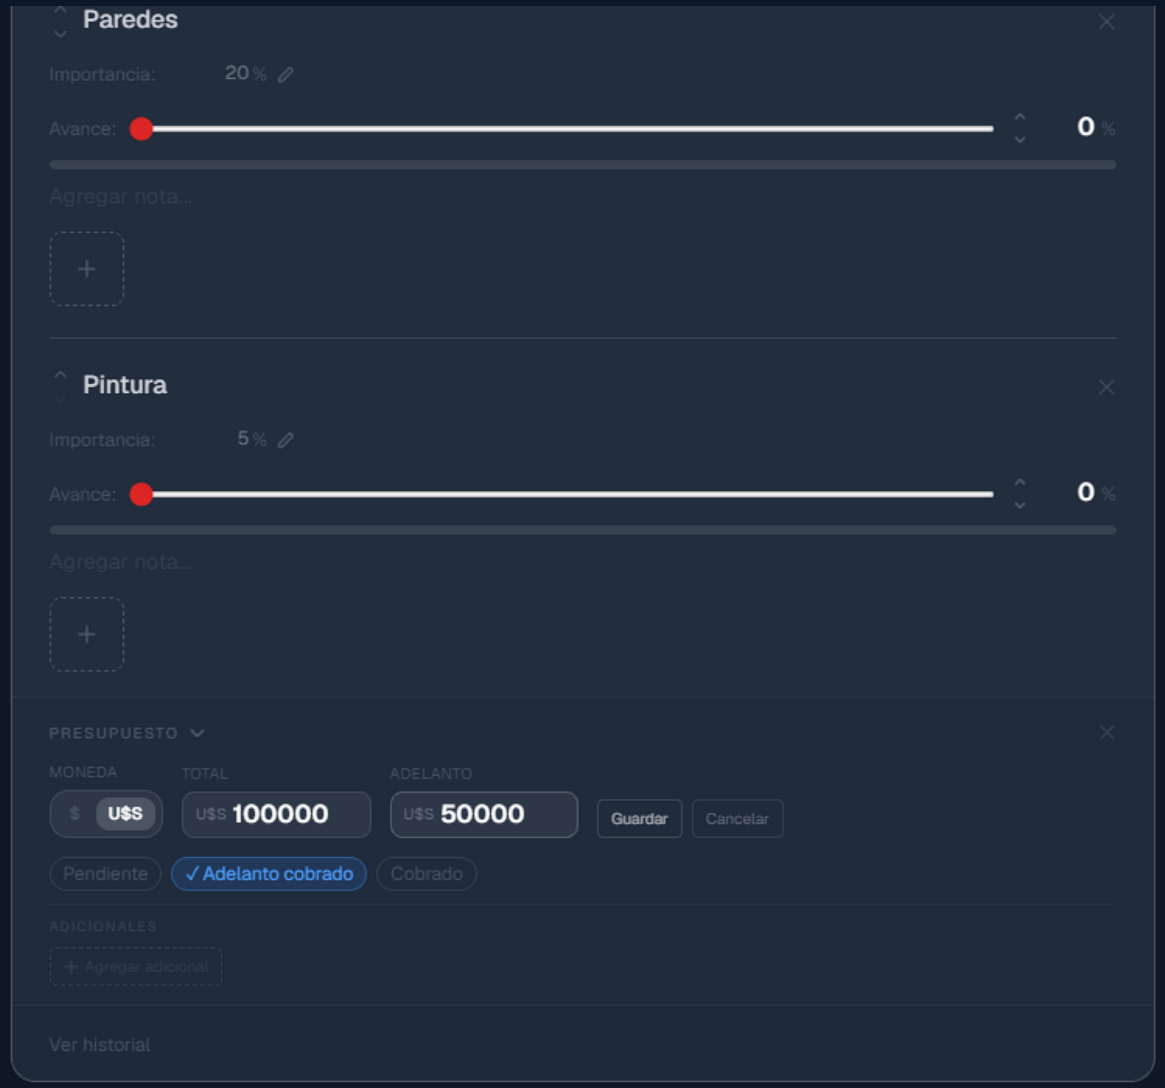

Each stage has an importance percentage; overall project progress reflects both that weight and the stage's actual advance.

ADMIN / COMPANY OWNER

Budget and payment status

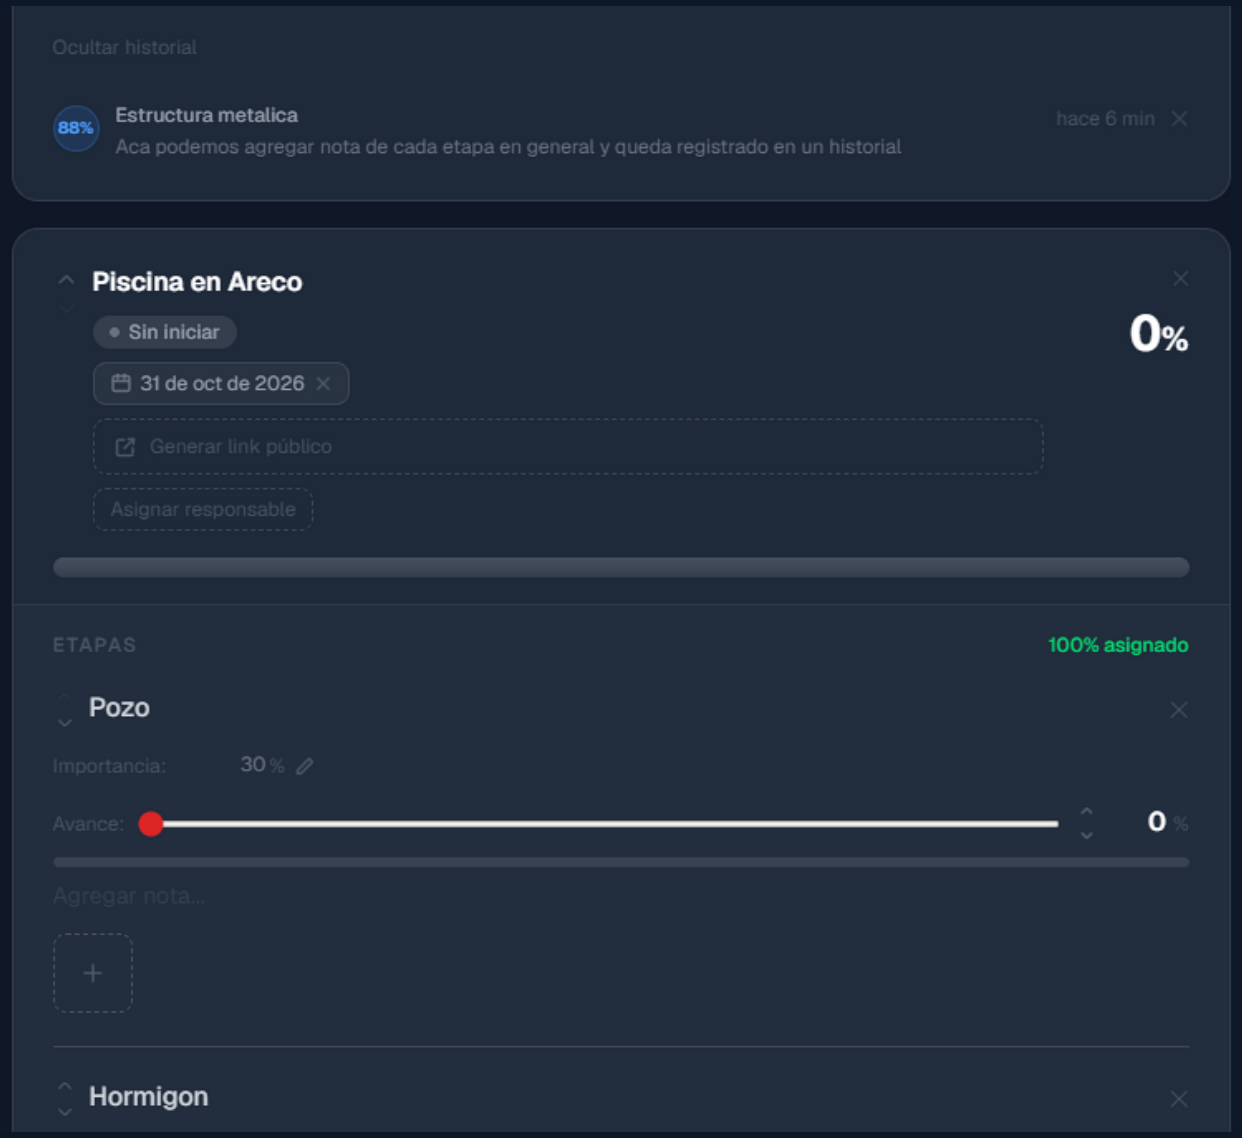

The company can update total budget, advance, balance and payment status as collections are received.

ADMIN / COMPANY OWNER

Multiple works under one company

The same company can manage separate projects; this example shows a second work, Piscina en Areco, with its own stages.

APP OBRA

One project. Clear roles. Real-time visibility.

Construction management for the company, transparent progress for the client.
